

tion of a claim to renewal of copyright, \$4; which fees shall include a certificate for each registration: *Provided*, That only one registration fee shall be required in the case of several volumes of the same book published and deposited at the same time: *And provided further*, That with respect to works of foreign origin, in lieu of payment of the copyright fee of \$6 together with one copy of the work and application, the foreign author or proprietor may at any time within six months from the date of first publication abroad deposit in the Copyright Office an application for registration and two copies of the work which shall be accompanied by a catalog card in form and content satisfactory to the Register of Copyrights.

“For every additional certificate of registration, \$2.

“For certifying a copy of an application for registration of copyright, and for all other certifications, \$3.

“For recording every assignment, agreement, power of attorney or other paper not exceeding six pages, \$5; for each additional page or less, 50 cents; for each title over one in the paper recorded, 50 cents additional.

“For recording a notice of use, or notice of intention to use, \$3, for each notice of not more than five titles; and 50 cents for each additional title.

“For any requested search of Copyright Office records, works deposited, or other available material, or services rendered in connection therewith, \$5, for each hour of time consumed.”

Sec. 3. This Act shall take effect thirty days after its enactment.

Approved October 27, 1965.

## PUBLIC WORKS—RIVERS AND HARBORS

PUBLIC LAW 89-298; 79 STAT. 1073

[S. 2300]

An Act authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That:*

### TITLE I—NORTHEASTERN UNITED STATES WATER SUPPLY

Sec. 101. (a) Congress hereby recognizes that assuring adequate supplies of water for the great metropolitan centers of the United States has become a problem of such magnitude that the welfare and prosperity of this country require the Federal Government to assist in the solution of water supply problems. Therefore, the Secretary of the Army, acting through the Chief of Engineers, is authorized to cooperate with Federal, State, and local agencies in preparing plans in accordance with the Water Resources Planning Act (Public Law 89-80) to meet the long-range water needs of the northeastern United States. This plan may provide for the construction, opera-

tion, and maintenance by the United States of (1) a system of major reservoirs to be located within those river basins of the Northeastern United States which drain into the Chesapeake Bay, those that drain into the Atlantic Ocean north of the Chesapeake Bay, those that drain into Lake Ontario, and those that drain into the Saint Lawrence River, (2) major conveyance facilities by which water may be exchanged between these river basins to the extent found desirable in the national interest, and (3) major purification facilities. Such plans shall provide for appropriate financial participation by the States, political subdivisions thereof, and other local interests.

(b) The Secretary of the Army, acting through the Chief of Engineers, shall construct, operate, and maintain those reservoirs, conveyance facilities, and purification facilities, which are recommended in the plan prepared in accordance with subsection (a) of this section, and which are specifically authorized by law enacted after the date of enactment of this Act.

(c) Each reservoir included in the plan authorized by this section shall be considered as a component of a comprehensive plan for the optimum development of the river basin in which it is situated, as well as a component of the plan established in accordance with this section.

## TITLE II—FLOOD CONTROL

Sec. 201. (a) The Secretary of the Army, acting through the Chief of Engineers, is authorized to construct, operate, and maintain any water resource development project, including single and multiple purpose projects involving, but not limited to, navigation, flood control, and shore protection, if the estimated Federal first cost of constructing such project is less than \$10,000,000. No appropriation shall be made to construct, operate, or maintain any such project if such project has not been approved by resolutions adopted by the Committees on Public Works of the Senate and House of Representatives, respectively. For the purpose of securing consideration of such approval the Secretary shall transmit to Congress a report of such proposed project, including all relevant data and all costs.

(b) Any water resource development project authorized to be constructed by this section shall be subject to the same requirements of local cooperation as it would be if the estimated Federal first cost of such project were \$10,000,000 or more.

Sec. 202. Section 3 of the Act approved June 22, 1936 (Public Law Numbered 738, Seventy-fourth Congress), as amended by section 2 of the Act approved June 28, 1938 (Public Law Numbered 761, Seventy-fifth Congress), shall apply to all works authorized in this title except that for any channel improvement or channel rectification project, provisions (a), (b), and (c) of section 3 of said Act of June 22, 1936, shall apply thereto, and except as otherwise provided by law, the authorization for any flood control project authorized by this Act requiring local cooperation shall expire five years from the date on which local interests are notified in writing by the Department of the Army of the requirements of local cooperation, unless
